Content	<p>School of Education, MIMT in association with Training and Placement Committee organized a “Workshop on Innovative Teaching Practices” on 20th April, 2022.</p> <p>The use of innovative teaching and learning strategies has been a hot topic for the last decade. Creative and skilled teachers are being found using different innovative teaching methods at higher education levels. Many studies consider creativity as a personal trait and intellectual ability of different individual associating creativity with genius and intelligence. The focus of innovation in teaching and learning is based on the trust that every student has the capacity to learn and be successful in life. A teacher should perceive each student as possessing unique personality characteristics that can be polished by using creative and innovative teaching methods. Having an awareness of the process of learning is very helpful for teachers to identify the problems students are facing in some of the subjects.</p> <p>There are many strategies, such as personalization, small learning communities, student advisories, multidisciplinary curricula, peer tutoring, peer instruction, and team teaching, which are used by teachers at different higher levels of education. This workshop was organized with the objectives of participants gaining an insight and first-hand experience about the various innovative teaching practices. This workshop was able to invoke the innovative tendencies of all the participants who were very enthusiastic and upbeat during the workshop.</p>
Outcome of Activity	<ul style="list-style-type: none">• All of the faculty and staff actively participated in the• They were made aware about new strategies.• They became aware about innovative practices in teaching learning process.• It was an opportunity to express knowledge for students.
